Table of Contents

List of Tables

List of Figures

1 Introduction

1.1 Product Overview

The cPCI-8301 is a standard 3U form factor CompactPCI 64-bit PMC carrier board with one PMC site. It supports 32/64-bit, 33/66MHz PCI buses. It is PICMG 2.0 CompactPCI Specification R2.1 and IEEE 1386.1 PMC Standard compliant.

Note: There is no VIO keying on the cPCI-8301. VIO is directly connected to connector J2 and defined by the backplane. Please check your backplane's VIO before installing your PMC card onto the cPCI-8301.

1.2 Unpacking Checklist

Check the shipping carton for any damage. If the shipping carton and contents are damaged, notify the dealer for a replacement. Retain the shipping carton and packing materials for inspection by the dealer. Obtain authorization before returning any product to ADLINK.

Check the following items are included in the package, if there are any items missing, please contact your dealer:

Included Items
cPCI-8301 carrier board
This manual

Note: The packaging of the cPCI-8301 OEM version with non-standard configuration, functionality, or package may vary according to different configuration requests.

CAUTION: The cPCI-8301 carrier board must be protected from static discharge and physical shock. Never remove any of the socketed parts except at a static-free work-station. Use the anti-static bag shipped with the product to handle the board. Wear a grounded wrist strap when servicing.

1.3 cPCI-8301 Mechanical Drawing

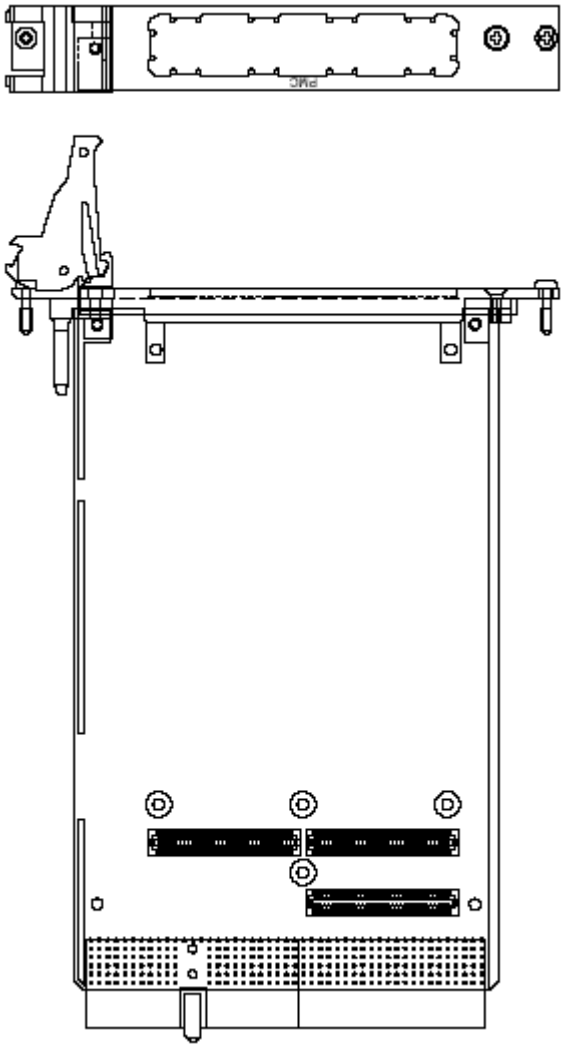

Figure 1-1: cPCI-8301 Carrier Board Layout

1.4 cPCI-8301 Functional Diagram

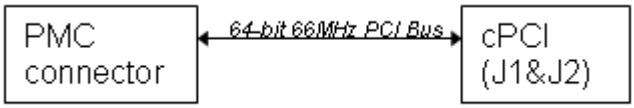

Figure 1-2: cPCI-8301 Functional Diagram

1.5 cPCI-8301 Placement

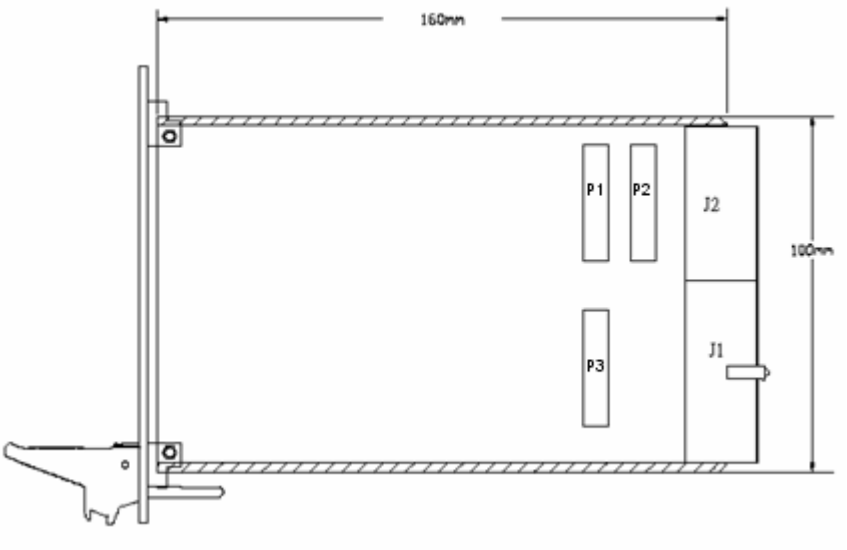

Figure 1-3: cPCI-8301 Top View

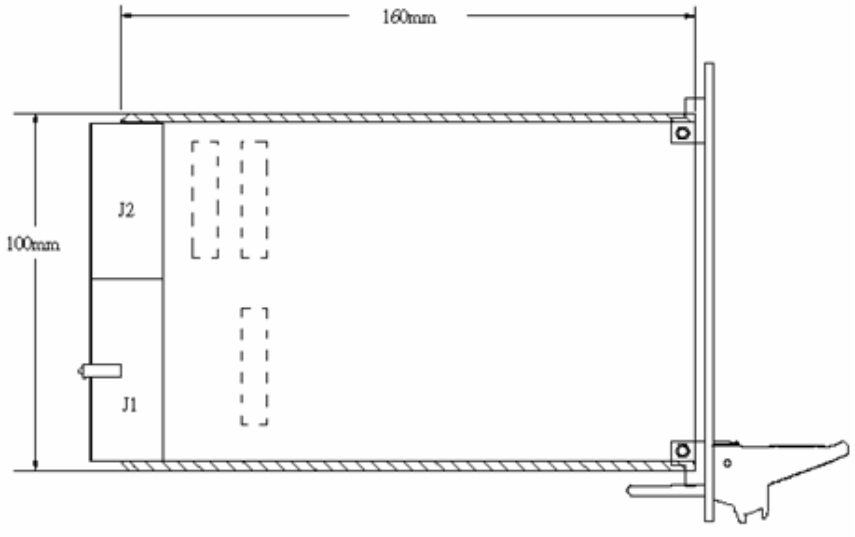

Figure 1-4: cPCI-8301 Bottom View

1.6 Number of Boards Supported per PCI Bus

The maximum number of cPCI-8301 boards that can be supported on one PCI bus is dependant on the frequency of the PMC cards installed. Please refer to the following table:

PMC Card frequency	33MHz	66MHz
Number of Boards on one PCI bus	4	2

Note: If one or more 33MHz PMC cards is installed, all cards will run at 33MHz, and this will determine the maximum number of boards supported.

2 Connectors

This chapter will familiarize the user with the connectors on the cPCI-8301.

2.1 PMC Connectors

The cPCI-8301 is a single I/O board for 64-bit PMC to cPCI transfer. PMC connectors P1-P3 are implemented. The P4 connector (User IO) is not implemented.

The Jn1, Jn2, and Jn3 PMC connector pin definitions are shown in the following tables:

Jn1 (32 Bit)				Jn2 (32Bit)			
Pin	**Signal**	**Signal**	**Pin**	**Pin**	**Signal**	**Signal**	**Pin**

Warranty Policy

Thank you for choosing ADLINK. To understand your rights and enjoy all the after-sales services we offer, please read the following carefully.

1. Before using ADLINK's products please read the user manual and follow the instructions exactly. When sending in damaged products for repair, please attach an RMA application form which can be downloaded from: http://rma.adlinktech.com/policy/.
2. All ADLINK products come with a two-year guarantee:

   ▶The warranty period starts from the product's shipment date from ADLINK's factory.

   ▶Peripherals and third-party products not manufactured by ADLINK will be covered by the original manufacturers' warranty.

   ▶For products containing storage devices (hard drives, flash cards, etc.), please back up your data before sending them for repair. ADLINK is not responsible for loss of data.

   ▶Please ensure the use of properly licensed software with our systems. ADLINK does not condone the use of pirated software and will not service systems using such software. ADLINK will not be held legally responsible for products shipped with unlicensed software installed by the user.

   ▶For general repairs, please do not include peripheral accessories. If peripherals need to be included, be certain to specify which items you sent on the RMA Request & Confirmation Form. ADLINK is not responsible for items not listed on the RMA Request & Confirmation Form.

3. Our repair service is not covered by ADLINK's two-year guarantee in the following situations:

   ▶Damage caused by not following instructions in the user's manual.

   ▶Damage caused by carelessness on the user's part during product transportation.

   ▶Damage caused by fire, earthquakes, floods, lightening, pollution, other acts of God, and/or incorrect usage of voltage transformers.

   ▶Damage caused by unsuitable storage environments (i.e. high temperatures, high humidity, or volatile chemicals).

   ▶Damage caused by leakage of battery fluid during or after change of batteries by customer/user.

   ▶Damage from improper repair by unauthorized technicians.

   ▶Products with altered and/or damaged serial numbers are not entitled to our service.

   ▶Other categories not protected under our warranty.

4. Customers are responsible for shipping costs to transport damaged products to our company or sales office.

5. To ensure the speed and quality of product repair, please download an RMA application form from our company website: http://rma.adlinktech.com/policy. Damaged products with attached RMA forms receive priority.

If you have any further questions, please email our FAE staff: service@adlinktech.com.
